

PEDAGOGY FOR THE PLANET

An exclusive CSE-GEN contest for EDUCATORS

Dear GEN Members,

In September's CSE-GEN lecture, we organised an interactive session on [designing effective climate change modules for students](#) and shared a [Climate Resource Kit](#) for educators; we hope it helped introduce climate change in your classrooms.

Now, we'd love to hear how you explore climate change with your students! If you've conducted classroom activities that sparked curiosity and action among students, share your innovative teaching ideas in our GEN contest: Pedagogy for the Planet!

WHAT ARE WE LOOKING FOR?

Creative, experiential ways to teach climate change — whether through hands-on experiments, role-play, community projects or multimedia activities. Share how you have inspired students to think critically about the climate crisis.

For example, in our Climate Resource Kit, we introduced the 'Be A Fact-ivist' activity, which combines data skills with the 17 Sustainable Development Goals to help students explore local issues with a data-driven lens.

HOW TO PARTICIPATE?

Choose any one theme from the list below. Design an innovative activity with a pre-defined outcome, tailored to suit the learners' needs. Please don't forget to cite the source if you borrow an idea from somewhere.

- Climate change science
- Extreme weather events
- Climate solutions: adaptation and mitigation
- Climate justice, equity & policies
- Communities & climate action
- Climate change and natural resources

**LAST DATE TO SUBMIT YOUR ENTRY
SATURDAY, NOVEMBER 9, 2024**

ELIGIBILITY

To participate, you must be:

A Green Educators' Network member. New participants can [register here](#)

Teaching an environment-related course at a higher education institution

ASSESSMENT CRITERIA

Originality and innovation

Adaptability of the activity to different classroom contexts and curricula

Connections drawn to real-world climate issues

Focus on the development of critical skills in students

WHAT'S IN IT FOR YOU?

The top activity idea entries will receive:

E-certificate of recognition from CSE

Opportunity to feature in the GEN newsletter

Exclusive CSE goodies and publications

Join us in this effort to empower students with knowledge and action on climate change!
